And Much More!

Dear Carpal Tunnel Sufferer,

Congratulations on reading this FREE report! You're going to discover how to avoid years of misery and frustration... the same misery and frustration millions of Americans suffer every day because they don't have this controversial information in front of them like you do right now! Carpal Tunnel Syndrome is a sneaky, potentially disabling epidemic that is sweeping America as we speak.

Many of your family, friends, and co-workers will experience the same numbness and tingling you do because of a number of factors including misinformation and inappropriate care.

That's why this report was written...so keep reading to find out what many doctors don't know about Carpal Tunnel Syndrome...the truth WILL shock you!

Don't Talk Or Speak To ANYONE About YOUR Wrist Pain Until YOU Finish Reading This FREE Report!

Reading this FREE Report may be one of the most important things you read this year. Why? Finally a doctor is breaking his silence and revealing the shocking truth about carpal tunnel syndrome other doctors don't know! The information in this report is vital if you want to avoid years of increasing pain, misery, and frustration, so please read this report from beginning to end. It may end up saving your life as you know it right now!

You, see what's so dangerous about carpal tunnel syndrome is that its not an injury like a broken bone or a cut or scrape. Carpal Tunnel Syndrome comes on slowly. You don't notice it at first. Or maybe you just brush off the pain thinking it's nothing. And then it slowly builds and builds. You start feeling numbness and tingling. It gets harder to type. You become more irritable. You start taking pills to get through the day.

And then one day you realize you just aren't the same person you used to be. And that's when you go to your family doctor to get checked out...

What Your Doctor Doesn't Know About Carpal Tunnel Syndrome CAN Hurt YOU!

If you were to go to your family or company doctor complaining about numbness, tingling, even sharp pains, you'll probably hear something along the lines of..."You probably have carpal tunnel syndrome. Here's some pain relievers and wrist splints. Come back if that doesn't take care of it..."

This is a blaring alarm that you're doctor may not be the person to talk to. You see, most doctors do great with general medicine. If you have a lung infection or diabetes, medical science can do wonders but when it comes to a condition like carpal tunnel syndrome, many doctors just don't have the training or experience to get you out of pain for good.

THAT'S RIGHT! MOST DOCTORS DON'T KNOW HOW TO TREAT CARPAL TUNNEL SYNDROME!

Carpal Tunnel Syndrome is a tricky condition. You see, your wrist pain can have a number of causes and some of those causes aren't even in your wrist at all! Because many doctors don't know where these places are, they assume the problem is solely in your wrist and focus on that.

Every day, thousands of carpal tunnel victims make the mistake of going to their family doctor because they don't know the information you're about to read. Going to your family doctor may result in your wrist pain becoming more severe, and worse yet, you may never get out of pain! Don't put yourself at risk for misery, suffering, and missing time from work.

This is why your doctor's treatment will never work if you want to get out of pain once and for all...

Dark Secrets About Pain Relievers, Cortisone Shots, And Wrist Splints Revealed...

The main problem with the kind of treatments many doctors give for conditions like carpal tunnel syndrome is that they never go after the root of the problem but focus on the symptoms. In your case: numbness, tingling, and other irritating pains. And when these treatments wear off (which they do) you'll often find they only cover up your pain for a short time and did nothing to fix what's causing your pain in the first place.

Pain relievers like motrin, aspirin, and tylenol will never cure you of Carpal Tunnel Syndrome! You see, they all pretty much work the same. What they do is disable a chemical in your body that tells your brain you're in pain (cortisone shots work almost in the same way). It's like wearing ear plugs to avoid a sound. While this may be okay once in a while, using these pain relievers can only make your condition worse in the long run in 2 ways:

1. Pain, as we all know, is your body's way to telling you you're hurt. And because you feel pain you stop doing things that can worsen your injury and make you hurt more. For instance, if you sprained your ankle and didn't know it, then you'd keep walking on it till it fell off or something horrible happened. So, your body tells your brain you're in pain so you know to keep off of it for a couple of days.

If you are taking pills so you can get through a day of work then you are probably making your problem worse because you've sabotaged your body's only means of keeping you healthy. Obviously, this form of treatment is not a permanent fix because no matter how many pills you take you'll never get better! Carpal tunnel is not caused by a drug deficiency, so drugs are not the solution.

2. The other reason taking these pills is dangerous has to do with the side effects these drugs can have on your body. You see, the chemical they disable does more than just report pain to your brain and depending on what pill you're taking you can leave yourself open to liver failure, kidney damage, and even gastrointestinal hemorrhage (stomach or gut bleeding).

Trust me on this, these 'side effects' are 100 times worse than the wrist pain you're taking these pills for in the 1st place!

Wearing wrist splints may seem harmless enough but they are not a cure. In fact, if you're only supposed to wear them when you're in pain, as you get worse you'll end up wearing these wrist splints more and more. They are not a good fashion accessory and using them as a crutch will only lead to the formation of abnormal, scar tissue in your wrist. And that will make your pain worse and your mobility less!

Face it, if your doctor is treating you by covering up your pain while your injury causing the pain gets worse and worse...

YOUR Doctor's Treatment May Be Making YOU Worse!

Since none of the treatments your doctor may be giving you are meant to cure you, logic says your condition will only get worse. You'll be wearing your wrist splint longer and longer and your pills will have to get stronger and stronger. If you're like most of the people I've talked to who have suffered from carpal tunnel syndrome for a long time, your life has probably become less than it should be. For instance, one woman's pain got so bad she couldn't play her piano any more. She even sold her piano because the mere sight of it would depress her.

You could say, with treatment like this... who needs torture?

If and when these treatment options fail to get rid of your carpal tunnel nightmare, your doctor may try sending you through physical therapy.

The problem here is, the physical therapist only follows the directions given by your doctor. And, if your doctor doesn't give the right diagnosis, your therapy will be anything but a cure-all... you may even feel worse!

When your physical therapy concludes, your doctor may tell you to consult with a surgeon. Now, surgery is a pretty extreme step. And how effective can a surgery be if no one knows where your REAL problem is? It's like trying to cure ankle pain by operating on your arm. Is it any wonder why so many carpal tunnel surgeries fail to get rid of your pain? In fact, any relief at all is usually temporary.

And then surgery also carries other risks like anesthesia and infection. You're also going to miss time at work, and maybe you'll lose some mobility. And even after rehab, there's still the risk that it will all wear off or that you may have some residual pain your doctor will tell you to learn to deal with.

There simply must be a better solution!

The #1 Reason Why Most Carpal Tunnel Treatments FAIL!

Fortunately for you, if your doctor's treatments fail it doesn't mean you're incurable. It just means they were looking in the wrong place! Part of the problem is the majority of doctors out there tend to get so side tracked with focusing on the wrists that they over look something so incredibly obvious it tends to shock carpal tunnel syndrome sufferers!

You see, in order for pain to travel to your brain it has to find a pathway. In essence, it needs a road to get there just like you need to take a road to get to your job in the morning.

In your body, this road is called your nervous system. And, the weird thing about nerves is if you interfere with the nervous system anywhere along its 'road' it can make you feel pain in other places...like your wrist!

So if all this attention your doctor has given to your wrists doesn't seem to pan out, it may be because there's nothing wrong with your wrists at all! In fact, you can be a normal healthy adult with perfectly normal wrists and still feel the pains associated with carpal tunnel syndrome!

That's right, you may be suffering from pain right now in your wrists and...

YOU May Not Even Have Carpal Tunnel Syndrome!

I know this may come as a shock to you. But imagine this: **If the REAL cause of your wrist pain, were to be found it can be treated. And if this spot or spots are treated safely and naturally, won't your wrist pain go away as well.**

Imagine how your life will change. You won't have to take pills anymore, you won't have to wear wrist splints.

I invite you to relax, close your eyes, and picture in your mind a day without your bothersome wrist pain. A day where you could do whatever you want and not worry if your wrists will allow you to feel the pleasure. Can you picture that image in your head? What favorite activity are you doing? How healthy and happy do you look? Who are you spending this time with? Are you really enjoying this moment as much as you possibly can?

Isn't a moment like this what life is all about?

How would you like to make that fantasy become your reality? How would you like to, once and for all, get rid of your wrist pain and all that goes with it? No more reduced life, no more irritation, no more limitations... just a happy, enjoyable life that everyone envies!

I Have Over 7 Years Experience Working With Carpal Tunnel Sufferers And Getting Them Out Of Pain Quickly, And Easily, Without Drugs Or Surgery!

Hello. My name is Dr. Marc Gottlieb, Clinic Director of Raleigh's Carpal Tunnel Recovery Center, Carolina Chiropractic here on Falls of Neuse Road.

I've spent years helping victims of carpal tunnel syndrome not only discover the truth about their wrist pain, but also getting them out of pain quickly, easily, and naturally without any drugs or surgery. That's why I put together this valuable, FREE Report. Frankly, I'm sick and tired of seeing people just like you walking around with bandages and splints on their wrists going through a lifetime of pain and misery because no one ever bothered to reveal to them the truth about their condition!

I've used a drug and surgery free method to help people get rid of their wrist pain as quickly, easily, and painlessly as possible. In fact, I've been able to help almost everyone who's come into my office complaining of wrist pain. And the truth is, the majority of the people I couldn't help 100%, I could have gotten better results if they had come to me sooner! But, no one has ever needed surgery after following my treatment protocol!

In fact, since I've been so successful and happy with helping people just like you get out of pain, I've focused a majority of my practice and skills at helping carpal tunnel victims get rid of their pain and keeping them that way! There is really nothing more pleasing than helping people just like you finally become pain free and living life on their own terms once again!

That's why I mailed you this FREE report. I want you to know the truth about carpal tunnel syndrome that almost everyone out there doesn't seem to want you to know. Because I've helped so many others, I know I can help you too!

Find Out RIGHT NOW If My State-Of-The-Art, Quick, Safe, And Natural Treatment Can Help YOU!

If you're suffering from constant, bothersome wrist pain, or maybe you just started feeling a slight numbness and tingling that you don't want to get worse, then there is hope for you to get rid of your pain once and for all!

In fact, I've helped design a quick and easy Carpal Tunnel Evaluation that can determine where all your wrist pain is REALLY coming from. In fact, doctors all over the country are now using this method to help carpal tunnel syndrome sufferers from all walks of life.

But, I have to warn you... It's in your best interest to get your pain evaluated right now because later on, if you procrastinate on this, then your condition might deteriorate to the point where I can't help you. Don't forget, the longer you wait to find out your problem, the longer it will take to fix the problem and get you out of pain.

What's A Carpal Tunnel Evaluation And Why Is It The Best Way To Find Out If You Are Injured In The Hidden Location Most Doctors Don't Even Know About!?!

The Carpal Tunnel Evaluation is a series of tests on your hands, wrists, arms, shoulders, neck and nervous system to find out where the real cause of your pain is.

But, the real treat is the tests can find out super quick if your problem may be in one of the hidden areas I've talked about before. We check muscle activity in your body and compare it to what we consider 'normal'. If you have a structural problem in your body then that will cause your muscles and nerves to give 'abnormal' function and pain.

The tests are quick, easy, and most importantly, painless! (The exam takes about 30-45 minutes).

In fact, we have several ways to check carpal tunnel sufferers and determine the real cause of your pain. When the exam is done, I'll even give you a written list of what is wrong so you can know where your problems are for yourself.

What's important is that you take a moment now to schedule your carpal tunnel evaluation test because, as I said before, now is the best time to find out where your pain is coming from. If you want to wait and procrastinate, you are only setting yourself up for more pain you don't have to feel. And, as you become worse and worse, then it will take longer and longer to really fix your problem.

Not taking advantage of this special offer right now will only hurt you. If time is a problem, we can schedule you at a time convenient for you (when was the last time a doctor told you this?). Again, the tests are quick and painless so you have nothing to lose, only lots to gain.

While this is still fresh in your mind, please pick up the phone and call Sharon at 870-9500 and she'll help find an available time slot for your carpal tunnel evaluation.

Even if it is after office hours, call right now and leave a message about a convenient time for you to make an appointment and we will call back as quickly as possible to find a time that suits you. (usually within 24 business hours!)

I hope you've benefited from discovering the truth about Carpal Tunnel Syndrome most MDs don't want you to know. Remember, it is up to you now, you have been told what will help you recover and the follow through is up to you. Let's get started.

Good luck on making the right choice.

Dr. Gottlieb – Raleigh's Carpal Tunnel Solution

PS - Don't forget, most MDs are not trained to diagnose and treat Carpal Tunnel Syndrome properly so if you DO suffer from wrist pain, almost any treatment your doctor is giving you will be ineffective and may even be harmful to you!

PPS - YOU need to schedule your evaluation Right Now for 2 reasons: 1. The sooner you find out and start treating the REAL cause of your pain, the quicker you can get rid of it once and for all without drugs or surgery. And 2. Spots are filling up fast because carpal tunnel sufferers all over town are calling to schedule their test so if you want to get a good spot at a time good for you, you need to call quickly!

PPPS - Even if you're pain just started up, it's a good idea to get checked out now because taking care of this now will save you tons of time and frustration in the future. Don't wait until Carpal Tunnel Syndrome cripples you to take advantage of my special offer.
